Caplin Point laboratories expansion plan includes its foray into Bangladesh. Management at Caplin Point, Vivek Partheeban speaks to ET Now about the opportunities in some of the South East Asian countries, as far as the supply is concerned.

Caplin Point laboratories deal with injectibles, which are used specifically in the hospitals. The foray into Bangladesh is more along the lines of sourcing rather than selling, which the company is also doing with China also, says Vivek Partheeban. The injectible's segment's demand has either remain strong or gone high due to the impact of COVID.

In terms of pricing there has been a fair amount of stability especially in injectibles, adds Vivek Partheeban.
